AI Birds.org Angry Birds AI Competition

Issues with Chrome

The website that used to host the game has been switched off. We are currently trying to find a solution that allows us to continue using the Chrome version of the game. In the meantime, as a temporary solution for competition participants only, you may try the following steps which may or may not work for you:

1. Download this file: **https://www.dropbox.com/s/3e6f4nele5c545f/Application%20Cache.zip?dl=0**
2. unzip it, you will have a folder named "Application Cache".
3. Close all your Chrome windows and kill all the background Chrome processes.
4. Set the file system so that it shows all hidden files.
5. Go to the directory
   - For Windows: C:\\Users\$your_user_profile$\AppData\Local\Google\Chrome\User Data\Default
   - For Linux: /home/$your_user_profile$/.config/google-chrome/Profile 1/
   - For Mac: /Users/$your_user_profile$/Library/Application Support/Google/Chrome/Default
6. You will see a folder named "Application Cache" (if you don't see it just skip the first part of the next step)
7. Change the name of that folder (to anything you can remember), and copy the one you just downloaded into the directory
8. Restart Chrome and access the game as before

If this works for you, we recommend you do not update Chrome until the end of the competition. You may have to copy the folder into the directory every time before you start the game.

Please let us know if you have any other ideas or if you are interested in converting our game framework to another version of the game.

Good luck!
